About Aerofit

Aerofit is a leading brand in the field of fitness equipment. Aerofit provides a product range including machines such as treadmills, exercise bikes, gym equipment, and fitness accessories to cater to the needs of all categories of people.

Business Problem

The market research team at AeroFit wants to identify the characteristics of the target audience for each type of treadmill offered by the company, to provide a better recommendation of the treadmills to the new customers. The team decides to investigate whether there are differences across the product with respect to customer characteristics.

1. Perform descriptive analytics to create a customer profile for each AeroFit treadmill product by developing appropriate tables and charts.
2. For each AeroFit treadmill product, construct two-way contingency tables and compute all conditional and marginal probabilities along with their insights/impact on the business.

Product Portfolio:

- The KP281 is an entry-level treadmill that sells for $1,500.
- The KP481 is for mid-level runners that sell for $1,750.
- The KP781 treadmill is having advanced features that sell for $2,500

Insights:

- Male has more income compared to female.
- Married male and female have more income than single ones.
- People with higher income feel more fit and excellent shape.
- As per age people are more conscious about their fitness.
- As per the observation married ones purchase more products and specifically KP281 because of the low price.

- There are more number of males purchasing all the products than female, KP281 and KP481 is approximately equal in both genders, KP781 is more popular in males because of the income scale, that is large for male gender.
- Correlation between age and fitness is 0.057, correlation between age and miles is 0.38, Correlation between income and fitness is 0.55.
- Customer profiling- KP281 is the most affordable entry level treadmill. It is popular in both the genders, age group of 25 to 30 prefer KP281. Younger to elder beginner level of customers prefer this product and have rated themselves as average shape in fitness rating. Income range between 40k to 50k have preferred this product.

Recommendations:

- Based on the income aerofit can recommend/offer KP281 entry-level treadmill to below median income people and KP481 mid-level runner to above median people and KP781 treadmill with advanced features to above median male such that treadmill sale will increase. Till then aerofit can promote the brand within the Female to get more orders from female as well.
- Aerofit can target the higher income people to increase the sales and get ready with new products at low price for low income people as well, Aerofit can give some discount on festive season such that low income people may also want to look good in shape during festival.
- Aerofit should start campaigns and ads for fitness freak people with some catchy line to inspire all age group.
- There are less number of females that prefer exercising equipments, Aerofit should give advertisement and start campaign to promote fitness through exercising equipments.
- KP781 is found to be a premier product of aerofit with advanced features, sales are less due to high price Aerofit should promote this product with the help of social media they can also organize some workshops in corporate sector and educational institutes to aware the customers about the additional features of this premium product.
- Aerofit should recommend KP781 product to their old users and provide the customer support to upgrade.
- Extensive research is required to promote the product for more than 50 years age.
